SUMMARY

Product Designer with 6+ years leading end-to-end design for enterprise and large-scale B2B SaaS products, including 2+ years in design leadership and strategic roles. I turn qualitative and quantitative research into shipped product decisions with measurable outcomes, cutting workflow steps, lifting task completion, and improving model accuracy. Deep experience across design systems, generative AI, and conversational interfaces (a 10-phase WhatsApp coaching flow), with full-stack design capability spanning Figma prototyping through production React and SwiftUI. Expert in Figma and Miro, and skilled at using storytelling and design metrics to align Product and Engineering around a shared roadmap.

EXPERIENCE

Runara, AI Deployment Platform (Enterprise SaaS) Jun 2025 – Jul 2026
Senior Product Designer, San Jose, CA

- Led end-to-end design for an enterprise AI deployment platform, partnering with Product and Engineering leadership to prioritize design challenges and shape the core product roadmap.
- Built a component-based design system in Figma and React (Material UI) that accelerated UI development and established a shared design language across teams.
- Presented interactive high-fidelity prototypes to external developer customers, using design storytelling to keep engineering and leadership aligned, accelerate feature planning, and streamline developer onboarding.

Iowa State University Jan 2024 – May 2025
Graduate Research Assistant, Product Direction & Interaction Design, Ames, IA

- Headed a cross-functional team of two designers and three developers, owning design direction and delivery.
- Owned product direction and interaction design for an internal enterprise tool used by 50,000 people, cutting a core workflow from 14 steps to 8 through research and validation.
- A/B tested a navigation redesign with 200+ participants, lifting task completion 18% and cutting time-on-task by nearly a quarter.
- Took an AI detection tool from PRD to shipped product with the ML team. Accuracy climbed from 67% to 89%, returning about 2,000 review hours per month to the operations team.

Alfaleus Technology, Healthcare (Enterprise SaaS) Nov 2022 – Mar 2023
Product Designer (Contract), Hyderabad

- Led usability testing with 25+ users and external partners on a multi-stakeholder enterprise healthcare platform, cutting critical errors 40% and raising task success 25%.
- Designed a WCAG 2.1 AA-compliant design system across web and mobile, where post-launch visual clarity scored 40% higher and shared components carried the brand across both platforms.

XR Labs, Consumer & Enterprise Jun 2019 – Aug 2022
Product Designer, Chennai

- Designed consumer and enterprise UI used by 10,000+ people across five releases, using role-based dashboards and a leaner workflow to cut onboarding time 34% and lift decision-making efficiency 20%.
- Ran A/B tests on conversion flows that raised checkout completion 15% and feature adoption 22%, collaborating across a globally distributed team to ship five releases on time.

SELECTED PROJECTS

Velotic, AI Fitness & Nutrition Coaching Platform Sep 2025 – Present
Founding Designer & Engineer, Web, iOS, Android

- Took Velotic from 0 to 1 as founding designer and engineer, running research, ideation, and product planning, validating three directions in Claude Code and Bolt, then designing and building the design system, frontend, and backend.
- Shipped a 10-phase WhatsApp Business API conversational coaching flow plus real-time D3 and Recharts dashboards in React, and set up the Firestore data model, IAM permissions, and Stripe and Razorpay payments for the US and India.

Cafe Cal, Consumer AI Food-Tracking App (India) 2026
Solo Designer & Engineer, Live on Apple App Store & Google Play

- Built a Gemini Vision food tracker, now live on both stores. Downscaled images on upload and locked Gemini to a JSON schema, eliminating the retry loop and cutting inference cost.

EDUCATION

Iowa State University, M.S. in Human-Computer Interaction Aug 2023 – May 2025
GPA 3.78 / 4.0, United States

SKILLS

Product Design Figma, Miro, user flows, wireframing, high-fidelity mockups, interactive prototyping, design systems & component libraries, interaction design, visual design, information architecture, responsive/multi-device design, usability testing, accessibility (WCAG 2.1 AA)

Methods user-centered design, discovery, customer validation, user research, A/B experimentation, PRDs, roadmapping, cross-functional design leadership, long-term UX strategy, enterprise SaaS & workflow-heavy B2B design, data-informed decision-making, storytelling, systems thinking

AI & Conversational Design generative AI product design, conversational interfaces (WhatsApp Business API), Gemini Vision, OpenAI & Claude APIs, function calling, structured output schemas, prompt engineering, multimodal pipelines, plus dev tools Claude Code, Cursor, and Bolt

Stack React, TypeScript, SwiftUI, JavaScript, D3, Recharts, Firebase, Material UI, GitHub Actions
